**Final Note by the Minister for Local Self Government and Public Health**

***Subject*** — Proposal to sanction a comprehensive estimate for Rs 41,24,441 for the Bangalore City Drainage Scheme

These papers relate to the drainage scheme in Bangalore City

The question of formulating a comprehensive scheme for the underground drainage system for Bangalore City has been under th consideration of Government for several years A scheme was pre pared by the Director of Public Health at an estimated cost of Rs 41,24,441 together with a detailed report and the same was thereafter scrutinised by the Chief Engineer

In the meanwhile, works included in the above estimate to the extent of Rs 12,79,181 were sanctioned by Government and executed to the value of about Rs 10 lakhs Towards this ex- penditure, the Bangalore City Municipal Council have contributed a sum of Rs 6,68,315/- and the Government have paid Rs 3½ lakhs, the latter having been provided for in the State Budget under "30 Grants for Public Improvements" 1 Bangalore City Improvement during the years 1939-40 and 1940-41

When the scheme was sent to the Bangalore City Municipal Council for approval and to point out the ways and means of financing it, they resolved that the scheme may be approved and that Government be requested to give their quota of half the cost as a lumpsum grant, the remaining amount being advanced by Government as a loan to them towards their contribution, subject to repayment in easy instalments While submitting this resolu tion to Government, the Municipal Commissioner has recommended,

(F N —contn )

on the basis of the above resolution, that excluding the amount already spent on the scheme, a sum of Rs 31 lakhs would be required to work out the remaining portion of the comprehensive estimate, out of which Government may be pleased to contribute a sum of Rs 17 lakhs in a lumpsum and the balance, viz , Rs 14 lakhs be given to the Municipality as a loan

When the papers went to the Financial Secretary, he expressed the opinion that it was not possible for Government to meet half the cost, which will be nearly Rs 21 lakhs, and that, for the present, Government might agree to make a total minimum grant of Rs 10 lakhs, including the grant already made, that the possibility of giving further grant may be considered after 1942-43 without any commitments and that in the meanwhile, the Municipality had to bear the balance

The question was considered in Council on 21st, 22nd and 23rd July 1941, when the following resolution was recorded -

" The comprehensive estimate for Rs 41,24,441/- may be sanctioned As a first stage the following works may be taken up and completed in two years -

| | | lakhs |
|---|---|---|
| 1 | Acquisition of lands for disposal works | Rs 2 7 |
| 2 | Extension of the main sewer | " 3 6 |
| 3 | Disposal works | " 4 |

A loan may be sanctioned to the Municipality approximate to the extent of Rs 3½ lakhs towards their share of cost, or the Municipality may be permitted to raise a loan For Government's share, due provision will have to be made in the Budget for 1942-43"

In order to take up the above works in the first instance a sum of Rs 10 3 lakhs would be required A provision of three lakhs of rupees has been made in the State Budget during the current year The Municipality will contribute a sum of Rs 3½ lakhs and the balance will be provided for by Government in the

(F N —contn )

State Budget for the year 1942-43

The Municipal Council may be given a loan to that extent by Government or permitted to raise a loan if they are willing to do so The question of financing the remaining portion of the scheme will be considered after the year 1942-43

The Director of Public Health will be requested to take up the above works urgently

I submit the proposal for His Highness' gracious approval

To

The Secretary to Government,
Law Department,
Bangalore

SIR

In continuation of this office letter No C 184-132 dated 4-1-1941 requesting sanction of Government to the comprehensive drainage scheme in connection with the Bangalore City Drainage, I have the honour to state that a provision of Rs 3,60,000 has been made therein for extending the main sewer from its present terminal in Sunkal arm up to Sankramangala tank

Underground drainage has been provided for the extensions that are springing up in Wilson Garden area and round about Kosur Road, and requisitions are being received for drainage estimates for new layouts in contiguous areas

The main sewer line has been taken up to the Sunkal Farm It is necessary at least as a first instalment to continue the sewer line up to a point little beyond the Sunkal Tank bund The cost of this portion of the work is estimated at 75,000/- which will be met from the grant to be made available for the next official year

I therefore request you to be so good as to obtain and convey sanction of Government to the scheme to enable this office to take further action in the matter of inviting tenders etc

A copy of letter No 729 dated 27th March 1941 of the Special Officer, Bangalore City Drainage Division is enclosed for the information of Government

I have the honour to be,
Sir,
Your most obedient servant,

Letter No 729 dated 27th March 1941 from the Special Officer, Bangalore City Drainage Division, to the Director of Public Health in Mysore, Bangalore

***

I have the honour to state that a provision of 3,60,000/ has been made for extending the main sewer from its present terminal in Bunkal Farm upto Gramangala Rajan, in the comprehensive scheme which has been submitted to Government for sanction The estimates have been scrutinised by the Chief Engineer and the entire scheme has to receive the Administrative sanction of Government

In the meantime, extensions are springing up in Wilson Garden area and round about Hosur Road Underground drainage has been provided for these extensions and requisitions are being received for drainage estimates for new layouts in contiguous areas

The main sewer line has been taken up to the Bunkal Farm and it is necessary to continue atleast, upto a point a little beyond the Bunkal Tank Bund as a first instalment, from the grant to be made available for the next official year The cost of this bit may roughly come to Rs 75,000/- I therefore request you to obtain Government sanction to the scheme to enable action being taken to invite tenders and to start the work as soon as the contractor is settled

Reference, Letter No L 9037 dated 23-4-1940
Bangalore City Drainage Scheme

---

I have the honour to forward herewith a report and estimates submitted by the Special Officer, Bangalore Drainage Division for the comprehensive scheme of underground drainage system for the City of Bangalore

As per scheme submitted by the Special Officer, the total cost is Rs 41 2514 lakhs, the details of which are as follows

| | | |
|---|---|---|
| 1 | Acquisition of land for disposal works extending the outfall sewage, etc | Rs 4.3 lakhs |
| 2 | Extension of the main outfall sewer from the Sunkal Farm to the disposal site near the Koramangala tank | 3 6 " |
| 3 | Treatment Works, lumpsum provision | 8 0 " |
| 4 | Works already done. | 9 94846 |
| 5 | Works that have to be done in the City for the collecting system | 15 39595 |
| | Total | 41 24441 lakh |

1 Acquisition of lands - The area that has been proposed to be acquired is 272 acres of land of Koramangala village including the tank bed of Koramangala and 70 acres of wet land of Neelasandra village Through the 70 acres of land of Neelasandra village the Ovoid sewer and the storm water drain will be carried and the land that will be available below this drain will be available for gardening but the land above may not be available for gardening

Of the 272 acres belonging to the Koramangala village, about 100 to 150 acres of land have to be set apart for the Horticultural Department in place of Sunkal Farm and about 100 acres have to be given to the Thigalars who own gardens along the present storm wate main within the City limits which now contains sewage Of the

total quantity of sewage effluent that will be available i e , nearly 2 million gallons per day, about 800 000 or 1 000,000 gallons will be utilised by both the Thigalars and Sunkal Farm taking for granted that each acre will require about 4,000 gallons per acre per day There will still be left about 1,000,000 gallons which if not utilised will go into lower tank in which a Jodidar has got some rights. It would be advantageous to the Municipality if some more lands are acquired so that all the sewage water or effluent may be utilised either on Government land or on land thus acquired so that it may be a source of revenue to the Municipality, as otherwise the owner of the tank below will get the right of water after enjoying it for some time

2 The extension of the main outfall sewer to a length of 12,000 feet is estimated at 3 6 lakhs of rupees as per estimates Of the 12 000 fett the first 2,000 feet is an extension of the existing main th next 10,000 is of increased dimension Perhaps this has been provided with the expectation that the Civil and Military Station authorities might allow their sewage to be dropped in as was discussed at one of the joint committee meetings

As a result of increase in size the capacity of the sewer has been increased from 9 million gallons per day to nearly 13 million gallons The quantity of water that is likely to flow through the ovoid sewer is about 9 million gallons, as the rest of the sewage will be going to other outfalls

The Special Officer in his report on page 12 says as follows .

On the assumption that there will be only one outfall for the whole city the sewage from all other outfalls being expected to be pumped to one valley, the size of the main has been designed to have a carrying capacity of 16 66 cusecs or 9 million gallons per day since the present scheme does not contemplate pumping of the sewage from a series of adjoining valleys to one outfall and since the actual consumption of water works out to only 16 gallons per head, this size will be more than ample for future requirements for a long series of years to come and further extensions in the valley " A

whether this increase in size is necessary, if the Civil and Military Station does not discharge into the main has to be decided

decided as this naturally increases the cost

There are two more points that have to be mentioned The Special Officer has mentioned on page 21 that "Even the squatting pan can be made of cement concrete and smoothly plastered over so as to reduce the cost and yet be efficient in working cheap in cost and requring little or no maintainance" I am of opinion that this cannot be made applicable in general as a pan with glazed surface would be very much better In the case of people who are very poor and cannot afford to buy the glazed pans the cement concrete pans may be recommended The majority of the people do not take with them one gallon of water as mentioned when they go to the closet, but they take only about a pint or pint and a half It is possible that some of the communities may be in the habit of carrying large quantities of water but majority do not

Provision of ventilating shafts for house connections is a necessity from the point of view of preventing nuisance particularly because a large number of houses are situated in the interior of the city where the latrines are within the houses

Acquisition of lands, extension of the main sewer and reaching of Koramangala tank

There are certain difficulties that will arise if the Koramangala tank is breached immediately The sewage that is now flowing in the storm water main and then on to the Koramangala tank will be carried through the contour channel towards the waste weir and from there on along the existing storm water drain to Sheelnagara tank, that is, as a result the whole length of the valley from Sunkal or Koramangala and Sheelnagara will become a breeding ground of mosquitoes particularly as the flow will be very sluggish for the sewage There is no agency outside the municipal limits either of Civil and Military station or city to attend to the mosquito control measures Further this sewage drain will be passing quite in front of the Military Slaughter house with only the road intervening The Military authorities are likely to raise objection These drains will be quite within the flight range of the British Military Hospital That is, the situation as regards mosquito pest will be worsened and the complaints that are now being received from the British Military

Military Hospital and the residents belonging to this area will be increased Hence I suggest that as measures are being taken to acquire Koramangala village and the tank bed the lands of Neelasandra be immediately acquired, the extension of the main outfall sewer be taken up immediately after deciding its dimensions In addition investigations b carried out to work out the details for the utilisation of all the effluent, that is, nearly two million gallons on l nd so that the Municipality may get all the benefit out of this water for which the Municipality pays heavily When once the main sewer is completed and the lands are made available for utilising the sewage the tank may be breached so that no further nuisance can be caused as a result

As regards the method to be adopted for treatment, I propose a sub Committee be appointed consisting of two Public Health experts and two Sanitary Engineering experts I suggest the following as members of the Sub Committee

1 The Director of Public Health, Government of Mysore
2 Dr J V Karve Retired Director of Public Health
3 Mr Patte, Superintending Engineer, Sanitary Circle, Government of Bombay
4 The Special Officer, Bangalore Drainage Division Secretary
5 The Sanitary Engineer, Government of Hyderabad

The Chairman may be selected by the Government

SIR

With reference to your letter No L 4330 dated nil -- November 1940 (received in this Office on 3rd December 1940) in the matter of pointing out the ways and means for financing the scheme for laying the underground drainage lines in the City I have the honour to state that the said letter was placed before the Municipal Council at their meeting held on 18th December 1940 along with the resolution of the Managing Committee dated 13th December 1940 on letter No C 184-53 dated 18th November 1940 from the Director of Public Health in the matter of acquiring the lands required for disposal works, etc The Council have approved of the scheme and further resolved that the Government be requested to give their quota, viz , half the cost as a grant and ~~that~~ advance the remaining amount as a loan subject to recovery from the Municipality in easy instalments

Out of the sum of forty-one lakhs of rupees (in round -- figures) required for this scheme, ten lakhs of rupees have been already placed at the disposal of the Sanitary Department, the Government quota of half the contribution being Rs Three and a half lakhs and the municipal quota of contribution being -- Rs Six and a half lakhs of rupees Out of the balance of -- Rupees thirty one lakhs still required, Rs Seventeen lakhs have to

to be paid by Government as a lumpsum grant and Rs Fourteen lakhs have to be lent to the Municipality, subject to repayment in easy instalments, as per Council resolution

Copies of the resolutions of the Managing Committee and the Council dated 13th December 1940 and 18th December 1940 respectively are herewith forwarded for favour of obtaining the orders of the -- Government on the resolution of the Council

I have the honour to be,

Sir,

Your most obedient servant,

Forwarded with compliments,

President & Deputy Comnr

Letter from No L 4330 dated November 1940 from the Law Secretary, forwarding report and estimates for Rs 41,24,441/- for the comprehensive scheme of the underground drainage system

===

Urgent Addl Subject No 1, 48 & 53 -

Mr B L Byanna observed that since the files were not circulated amongst them and since the amount involved was very heavy, they could not readily accord sanction to them without knowing details and so moved that the same may be deferred

The Commissioner explaining the subjects said that they had already done works upto ten lakhs and this scheme was a -- comprehensive one and they may approve of the same

The Commissioner observed that the scheme may be approved and they may request Government to give their quota of half the cost in a lumpsum grant and the remaining amount may be paid by Government as a loan subject to the condition that it is recovered from the Municipality in easy instalments

Then the above suggestion of the Commissioner was approved and the opinion of the Managing Committee in Urgent subject No 53 was also approved

K Venkatarao

Director of Public Health

PROGRAMME OF 1941-42

The Deputy Commissioner, Bangalore District has stated both by letter and personally that he will work out Rs 1,00,000/- during the current year and the balance of Rs 1,00,000/- next year

The grant that will therefore be required for the next year (1941-42) is

| | | Rs | | |
|---|---|---|---|---|
| 1 | Land acquisition (Koramangala area) | 1,50,000 | 0 | 0 |
| 2 | Continuing the main line upto Sankal Tank Bund | 75,000 | 0 | 0 |
| 3 | Constructing the sub-main line on the East Road of Basavangudi - sanctioned in G O No L 7743-56/ LL 143-38-4 dated 27-3-1939, but ordered to be kept in abeyance | 50,000 | 0 | 0 |
| 4 | Other works such as construction of remaining street sewers in City area | 1,00,000 | 0 | 0 |
| 5 | Construction of disposal works (part) | 1,25,000 | 0 | 0 |
| | | Rs 5,00,000 | 0 | 0 |

Note

Item No 2 — Only Rs 75,000/- is provided for item No 2 as there is no possibility of doing the whole line in one year

Item No 3 — This is provided as it is necessary to do the work

Item No 4 — Some areas in the City had not been included in the sanctioned estimates prepared sometime back. These were ascertained during execution and supplemental estimates have been submitted. These are to be carried out to complete the City proper

Item No 5 — A lumpsum provision of Rs 8 lakhs is made in the scheme for disposal works in all the outfalls. The exact amount in each case will depend upon the method of pre-treatment to be adopted and estimates have to be prepared after the question is settled. Therefore a lumpsum of Rs 1,25,000 is made for the works for this year

The Municipality have given a total contribution of Rs 6,68,315 and they expect the Government to give a similar sum to make up Government share. Government have already given Rs 3,50,000/- and this they will have to make a grant of Rs 3,18,315/- and the Municipality the rest of the amount required for 1941-42

Bangalore

SIR

I have the honour to enclose herewith a copy of the letter received from the Special Officer, Bangalore City Drainage Division, Bangalore showing the extent to which provision has to be made for meeting the expenditure towards construction of the main outfall, disposal arrangements and extending the valleys drain to the Magadi road I may mention here that the amount estimated against each item is provisional and rough as the details have not yet been worked out The extent to which the main outfall can be completed during the year 1941-42 is not declared It will depend upon the quickness with which money is provided and all the details are worked out before the work is taken on hand As to the disposal arrangement in Doraisani ala tank the details of broad irrigation have yet to be worked out As regards the third item the extent to which this main can be taken to the existing tank depends upon the time taken for the acquisition of lands

I have the honour to be,
Sir,
Your most obedient servant,

P Parthasarathy
Director of Public Health

# PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE

**Read —**

Letter No C 184-157 dated 15th May 1941 from the Director of Public Health in Mysore requesting sanction to the marginally noted estimates relating to the laying of street sewers in Cubbonpet and in the remaining areas of the Bangalore City in connection with the underground drainage scheme in Bangalore City

Order no

The question of formulating a comprehensive schem

for the underground drainage
system for Bangalore city has
been under the consideration
of Govt for several years
A scheme was prepared by the
Dr of P. Health at an estimated
cost of Rs 41,24,441 together with
a detailed report and the same
was thereafter scrutinised by
the chief Engineer In the
meanwhile, works included
in the above ~~estimate~~ estimate to the
extent of Rs 12,79,181 were
sanctioned by Govt ~~and~~ and executed
to the Value of about Rs 10 lakhs *List of Enclosure*
Towards this expenditure, the
Bo of H. have contributed
a sum of Rs 6,68,315 and the
Govt have made a grant of ½ lakhs,
~~the latter having been provided~~ *Copied by*
out of the provision made therefor
for in the State Budget under *Examined by*
" 30 Grants for Public Improvements "
1 Bangalore city Improvement

during the years 1939-40 & 1940-41.
When the scheme was sent to
the Govt of India for approval and to
point out the ways & means
of financing which they have resolved
that the scheme may be
approved and the Govt be
requested to give their grant
of half the cost as a lump
sum grant, the remaining
amount being advanced by
Govt as a loan towards
their contribution, subject to
its repayment in easy instal-
-ments. While submitting
this resolution to Govt, the
Mil Comm has recommended,
on the basis of the above
resolution, that excluding
the amount already spent
on the scheme, a sum of
Rs 31 lakhs would be
required to work out the
remaining portion of the,

380—GPB—22,500—14 3 38

comprehensive estimate,
out of which Govt may be
pleased to contribute a sum
of Rs 17 lakhs in a lumpsum
and the balance, viz, Rs 14
lakhs Off given to the mcp
as a loan | The Financial
secy who was consulted in
the matter has expressed the
opinion that it was not
possible for Govt to meet
half the cost, which will be
nearly 31 lakhs, and that
for the present, Govt might
agree to make a total minimum
grant of Rs 10 lakhs, including
the grant already made, that
the possibility of giving further
grant will be considered after
1942-43 without any commitments
& that in the meanwhile,
the mcp had to bear the balance

On a careful consideration
all the aspects of the case

Govt consider that
in their present financial
condition, it will not be
possible for them to pay such
a large amount of that it
Govt grant may be
limited to a sum
Rupees ten lakhs,
including the Grant
already made

(*Continuation sheet draft form*)

Govt are pleased to sanction
for the comprehensive
estimate for Rs 41,24,441
the further direct that
as a first step
the following works be taken
and completed in two
1) Acqng lands for proposed works Rs 2.7 Lakhs
2) Extension of the main Sewer " 3
3) Proposed works " 4
2 and 1.
of loan of Rs 3½ Lakhs and
be sanctioned to the city mcpl
towards their share of the cost of
necessary or the mcpl to permit
to raise a loan

To meet the cost of the above
works amounting to Rs 10 3
Lakhs, a provision of Rs 3 Lak
has been made in the
current year's State Budget
and the mcpl should contribute a
sum of Rs 3½ Lakhs. The
balance will be brought forward
by Govt in the State Bu
for the year 1942-43

WD 0280—GPB—22,500—14 3 38

to meet their portion of the cost as above

(If required)

The Municipality will be given a loan of Rs 3½ lakhs by the Govt of ~~required~~ or ~~is permitted~~ they will be to raise a loan if they are willing to do so

The question of financing the remaining portion of the scheme will be considered after the year 1942-43.

The Dr of P Health is requested to take up the above works urgently and complete them before the end of 1942

for consideration that there is need for ~~[illegible]~~ Kharar Connecting with Severed areas. for the action of the Municipality is requested to take necessary further actions accordingly

ORDER No L3422-26/ML90-41-4

Dated, Bangalore 18th Nov 1941

The question of formulating a comprehensive scheme for the underground drainage system for Bangalore City has been under the consideration of Government for several years A scheme was prepared by the Director of Public Health at an

estimated cost of Rs 41,24,441 together with a detailed report and the same was thereafter scrutinised by the Chief Engineer In the meanwhile, works included in the above estimate to the extent of Rs 12,79 181 were sanctioned by Government and executed to the value of about Rs Ten lakhs Towards this expenditure, the Bangalore City Municipal Council have contributed a sum of Rs 6,68,315 and the Government have made a grant of 3½ lakhs, out of the provision made therefor in the State Budget under "30 Grants for Public Improvements" 1 Bangalore City Improvement during the years 1939-40 and 1940-41 The scheme was sent to the Bangalore City Municipal Council for approval and for suggesting the ways and means of financing it They have resolved that the scheme may be approved and the Government be requested to give half the cost of their quota as a lumpsum grant, the remaining amount being advanced to them by Government as a loan towards their contribution, subject to its repayment in easy instalments On basis of the above resolution, the Municipal Commissioner has recommended that, excluding the amount already spent

on the scheme, a sum of about Rs 31 lakhs would be required to work out the remaining portion of the comprehensive estimate, out of which Government may be pleased to contribute a sum of Rs 17 lakhs in a lumpsum and the balance viz , Rs 14 lakhs given to the municipality as a loan Government consider that, in their present financial condition it will not be possible for them to pay such a large amount in a lumpsum, and that the Government grant may, for the present, be limited to a sum of Rupees Ten lakhs, including the grant already made Government are pleased to sanction the comprehensive estimate for Rs 41,24,441 They further direct that, as a first stage, the following works be taken up and completed in two years -

| | Lakhs |
|---|---|
| (1) Acquisition of lands for disposal works | Rs 2 7 |
| (2) Extension of the main sewer | Rs 3 6 |
| (3) Disposal works | " 4 0 |
| Total | 10 3 |

To meet the cost of the above works amounting to Rs 10 3 lakhs, a provision of Rs 3 lakhs has been made in the current year's State Budget, and the

the Municipality should contribute a sum of about Rs 3½ lakhs The balance will be provided for by Government in the State Budget for the year 1942-43 To meet their portion of the cost as above, the Municipal Council ~~will if required be given a loan of Rs.3½ lakhs by the~~ Government or ~~they will be permitted to~~ raise a loan ~~if they are willing to do so.~~

The question of financing the remaining portion of the scheme will be considered after the year 1942-43

The Director of Public Health is requested to take up the above works urgently and complete them before the end of 1942-43

Government consider that there is need for expediting house connections in the several sewered areas in the City and the Municipal Commissioner is requested to take necessary further action accordingly
